

## **Permanent Makeup – Pre-Procedure Information**

### **Appointment Time**

- A new permanent makeup procedure takes approximately **2 hours per area**.
- Multiple areas can be done in one appointment (e.g. brows and eyeliner) if booked correctly.

### **Comfort & Anaesthetic**

- Topical numbing cream is applied before and during the procedure for your comfort.
- For eyeliner, your eyes remain closed throughout the appointment, making the process easier.

### **Eyeliner Clients**

- Please arrive **without eyelash extensions**.
- If you wear contact lenses, we recommend wearing **glasses** on the day. (Contact lens solution is available if needed.)

### **Lip Colour Clients**

- If you have ever had **cold sores/fever blisters**, please obtain antiviral medication from your doctor and start taking it **2 days before your appointment**. This is essential for full lip colour procedures.

### **General Information**

- Permanent makeup is a form of **cosmetic tattooing** and is a long-term solution. Results vary and depend on factors such as skin type, colour choice, and aftercare.
- Some sensitivity and tenderness is normal for a few days after treatment. Aftercare cream and written instructions will be provided.

### **Important**

- Permanent makeup is a **multi-session process**. Touch-ups may be needed to achieve the desired result and are **not included** in the initial price.
